

Small Scale Commercial Investment

Over the past 40 years Stage One have supported and invested in West End and Number 1 tours across the UK and overseas. Now Stage One can offer to invest in smaller scale productions (not West End Venues¹) that fit the guidelines below. The aim is to be able to support a wider range of productions and to help producers create more commercially viable work and increase their pool of investors. For investment in West End productions please see our Commercial Investment Guidelines.

Please note that we are **not able to invest in Edinburgh Fringe Shows** or shows performing internationally and Producers who have received Stage One Investment for a West End production are precluded from applying.

The maximum investment Stage One can offer is £10,000 and capped at 20% of the capitalisation – all applications must be received 4 weeks before the first rehearsal.

The decision whether to invest in a production is made by a committee made up of active producers, at their discretion the guidelines may be varied depending on the individual circumstances of any production.

Stage One will normally give a commitment to invest (or not) within four weeks of the receipt of the papers. In the event that an offer to invest is made, Stage One will provide one session with a production accountant to ensure all figures are accurate. The producer must then show that they have the balance of the capital in hand, at which point the Stage One monies can be sent. This should normally be by the first day of rehearsals, but in any event should be no later than one week prior to the first paid public performance. No funds can be sent beyond this date.

Investment Criteria:

- 1) Figures presented to Stage One must be **clear and unambiguous** (in particular, accurate costings and detailed estimates of how long until recoupment may be reached at varying levels of box office are required).
- 2) Producers must have taken part in the 3 day New Producer's Workshop
- 3) The production must be **contracted for a minimum of 4 weeks (32 performances)**, and be able to recoup the estimated production costs plus a 10% contingency at **75% of Net Box Office Capacity²** within this period.
- 4) The **cast and creatives must be paid (at least) National Minimum Wage** and the production will adhere to the Equity Fringe Agreement. If the production is contracted under other union guidelines then please do provide details of this in your application.
- 5) Stage One should receive no less than **60% of the profits**.
- 6) The total weekly management fee ³ should be no greater than **10% of the weekly running costs and capped at £2,250**.

¹ West End venue is defined as a Society of London Theatre member venue.

² Net Box Office Capacity is defined as the total gross receipts if every seat (excluding pp seats) in the house at full price less VAT and then less a further 10% to cover commissions etc., or a percentage that accurately reflects the deal with the theatre.

³ Management fees are defined as the total weekly payment of all fees to the producers and general managers of the production, and include all office expenses and charges. They do not include reasonable charges for accountancy, production management fees or marketing fees which are expected to be within industry norms.

- 7) Management fees should **not be claimed for more than 2 weeks** prior to the first paid performance.
- 8) Producer's **Royalty should not exceed 2.5%** if royalties are being calculated on Net Weekly Box Office ('The Gross') and if being calculated in a pool the producer's royalty should not exceed 5% weekly operating profit pre-recoupment.⁴
- 9) Stage One will receive full accounts within 3 months of the close of the production.

If your production is within 10% of the guidelines please do seek advice from the Stage One team on enquiries@stageone.uk.com / 0207 5576700

⁴ Weekly operating profit is defined as the profit remaining once the weekly running costs of the show have been deducted from the weekly Net Box Office figure.
